Rainwater Construction Company Joins the Fleming Construction Group

As a member of the Fleming family, Rainwater Construction will continue to deliver best-in-class steel-erector and construction services to customers in the South and beyond.

Tulsa, OK, October 25, 2021 – The Fleming Construction Group (FCG) is pleased to announce that Atlanta-based commercial building contractor Rainwater Construction Company is now part of the FCG family. Rainwater will serve as Fleming’s structural steel, roofing, and new building construction arm in the Southeast, encompassing Georgia, Florida, Tennessee, and beyond. This collaboration brings together two relationship-forward companies with decades of experience as large-scale new construction and Butler Manufacturing™ PEMB experts.

As part of this transition, long-time Butler Manufacturing™ executive Steven Hudgins has been appointed Rainwater’s new president, with PEMB design and estimating expert Maryna Hudgins, P.E. serving as vice president.

“We are so honored to be a part of the Rainwater Construction team and the Fleming family of companies,” said Steven Hudgins. “The Rainwater crew has been delivering excellence to the Atlanta business community for decades, and Fleming is trusted by some of the biggest names in global commerce to construct the buildings that keep their businesses growing. You simply could not ask to work with a better group of people or for a better organization.”

An Atlanta mainstay since 1956 and an authorized Butler Builder® since 1958, Rainwater Construction is a people-first company dedicated to helping businesses succeed and grow by providing them with the highest quality, budget-aware construction services. With 2,700 completed projects and a 90% repeat business rate, Rainwater attributes its success to a relationship-first mindset that accounts for both clients and team members—some of whom have been with the company for decades. This philosophy aligns perfectly with that of the Fleming Construction group who has been supporting business in Oklahoma and beyond since 1946.

“Here at Fleming, we’ve built our reputation around value and quality, and we believe you can’t have either without solid relationships with both clients and crew members,” said FCG company president

Justin Willett. “Rainwater has been delivering excellence almost as long as we have, and their success stems from the same roots as ours. We’re proud to have them as the newest members of our corporate family, and we look forward to the successes this partnership is sure to bring.”

Rainwater Construction Company joins Fleming Construction, Fleming Steel Erectors and Fleming 8760 under the Fleming Construction Group umbrella. About Fleming Construction Group: Since 1946, Oklahoma-based Fleming Construction Group (FCG) has been a leader in pre-construction, construction, and post construction/retrofit for non-residential and industrial facilities development. With a national portfolio, more than 65 million square feet of transactions, and a management team dedicated to blending experience with technological advancement, the FCG name is synonymous with innovation, quality and expertise. For more information, please visit <https://www.flemingconstructiongroup.com/>.

About Rainwater Construction: Rainwater Construction Company is a self-performing steel erector and turn-key general contractor serving the Atlanta metro area and beyond. With over six decades in operation, Rainwater has one of the longest-standing partnerships with PEMB provider Butler Manufacturing. As a relationships-first company, our mission is to support businesses by providing them with best-in-class construction and workmanship on buildings that withstand the test of time. Our portfolio includes work for schools, churches, the US military, and private industry. For more information, please visit <https://www.rainwaterconstruction.com/>.
