

FEATURED PROJECT FCG BUILDS JARBOE SALES' 270K SQUARE FOOT DISTRIBUTION CENTER, THE LATEST PROJECT IN A CONSTRUCTION PARTNERSHIP THAT BEGAN IN 1959

BUSINESS: JARBOE SALES COMPANY

CATEGORY: DISTRIBUTION

LOCATION: TULSA, OK

CONSTRUCTION TYPE: NEW CONSTRUCTION

SQUARE FEET: 270K

Jarboe Sales has provided quality liquor, wine and beer products to Oklahoma bars, restaurants, hotels and liquor stores since licenses were first issued in the state in 1959. When it was time to consolidate and expand their Tulsa-based operations, Jarboe reached out to the Fleming Construction Group, building upon a construction partnership that dates back to that same year of 1959.

To accommodate their expansion and help position them for another 60+ years of success, Fleming built Jarboe Sales a new 270,000 square foot facility that strikes the balance between state-of-the-art distribution capability and cost-efficiency. The highly functional building shell includes Butler Manufacturing® PEMB structural steel and is capped with the incomparable Butler MR-24® roofing system.

Most projects of this size and complexities face challenges, and while this project had a few, we're proud to say this building helps to further solidify the relationship between FCG and Jarboe Sales, which, more than three years later, is stronger than ever.

PROJECT SCOPE

- Butler Structural Steel System
- MR-24® Standing Seam Roof

RESULTS

- Completed On-Time and Under Budget
- Zero Safety Incidents

"We are so honored every time a client comes back to do another project with us. It's the ultimate compliment, and the ultimate reward for a job well done. Jarboe Sales has put their trust in us for decades, and we take that honor very seriously. In return, we will continue to do our best to deliver highest quality construction that lasts the test of time." -JUSTIN WILLETT, FCG PRESIDENT
